PRODUCT DESCRIPTION

HALIT LED garden luminaire with motion sensor is designed for wall installation and will be useful in all these parts of your property where an automatic switch on/off of the lighting can considerably increase comfort and security. Aesthetically designed, equipped with an elegantly built-in PIR motion sensor and, thanks to IP65 ingress protection, it can easily withstand heavy rains and summer dust. It will allow us to comfortably get back home, take out garbage in the evening, signal the presence of guests at the front door or go to the basement down an otherwise dim staircase. The outdoor wall lamp HALIT can generate light of 600 lm power

in a neutral color temperature of 4000K. It will successfully brighten up a terrace or veranda, and will also do a good job as decorative lighting. Furthermore, the luminaire has a high grade of IK10 rating, which means that it is exceptionally resistant to impacts and mechanical damage – it will withstand an inaccurate football kick or an accidental stone hit.
