CAR - set of quick splice connectors, 50 pcs.

Marka: **Orno** | Symbol: **OR-KK-8116** | Ean: **5908254822728**

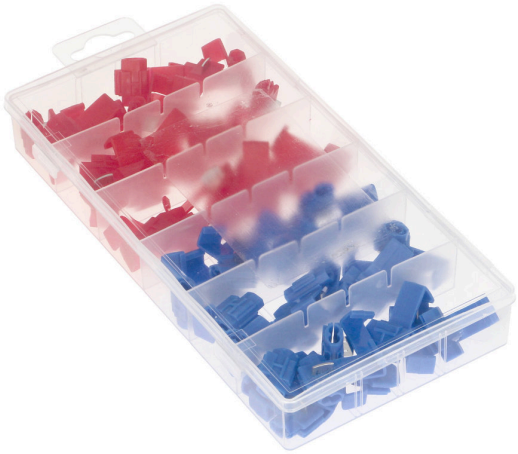

PRODUCT DESCRIPTION

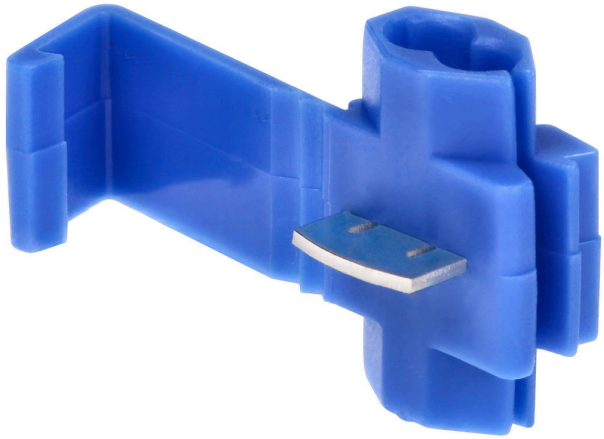

A set of 50 pieces of quick splice connectors that fit the most commonly used diameters of electric cables - 25 pcs x 0.5-1 mm2 and 25 pcs x 0.75-2.5 mm2. The connectors allow to connect wires or distribute power from the available installation in order to, e.g. create a +12V potential from the battery or the ignition switch. Thanks to the metal conductive element, which is an integral part of the connector, there is no need to solder or strip the existing wires. Everything is placed in a convenient, plastic box. The box is transparent, so you always see how many connectors you still have available.
